

LEICA M PL MOUNT
ENDLESS CREATIVITY

Effortless Functionality

Baseplate

The custom baseplate attaches directly and securely to the lens mount providing support for heavier PL mount lenses without putting stress on the native M mount.

Handgrip

The integrated handgrip provides ergonomic and stable handling when using heavier cine lenses.

Endless Creativity

Lenses

Compatible with all traditional PL mount cine lenses. Remove the PL mount and use standard M lenses.

Viewfinder (optional)

An articulating electronic viewfinder (Leica EVF-2) allows for more comfortable, traditional operation and composition, and makes it easy to use for low-angle shots.

Leica M PL Mount

The Leica M (Typ 240) and Leica M-P (Typ 240) digital rangefinder cameras delight photographers with their feel and performance. The introduction of the Leica M PL Mount enables the use of traditional PL mount cine lenses on these cameras to create a powerful tool for the cinematographer and image enthusiast on set, on location and in the street.

Quickly and securely attach the custom baseplate and PL mount to the camera to enter a world of possibilities where using it as a next-generation directors' viewfinder is just the beginning. Capture faithful reference photos and videos in the moment. Take advantage of the Leica Max CMOS sensor and "A" Camera lenses for stunning production stills, or truly maximize the 24MP full frame sensor for VFX plates and specialty shots. Explore unique "B" or "C" Camera options with the ability to capture 1080p video in a compact package.

Imagine location scouting with the Leica M camera and M PL Mount during the day, accurately capturing not just the look but also the cinematic feel of a place, then in the evening easily removing the M PL Mount for a street photography walkabout in a new town.

Cine Lens Mission Statement

Creating beautiful images is about more than just passing light to a digital sensor or film emulsion. It requires a deep love and understanding of what makes an image beautiful, pleasing, haunting and emotional. With Leica's 100 years of image making excellence behind us, our history of fine lens manufacturing will become your future cinematic creation.

About CW Sonderoptic

CW Sonderoptic GmbH works in conjunction with Leica Camera to design, develop and manufacture lenses and other cine products that have emotion at their core.

Our Website

On the CW Sonderoptic website you can find more than just product details. Use our Rental Locator to find a rental house near you that offers Leica Cine Lenses for rent and testing. The website also features a list of film, television and commercial productions that have used the Leica Cine Lenses.
